Hi All –

Per our conversation today, we agreed to modify the due date of the testing protocol to 30 days from today (meaning I will expect to receive it on Monday, April 14). We further agreed that, barring any major difficulties scheduling the testing, the testing would be performed within 45 days after April 14).

Finally, we agreed that testing for all pollutants at the Atwood plant would be done on the one operating furnace.

Let me know if you have any additional questions,

Eleanor
